VIEW ACCOUNT USAGE

Welcome, Hyder!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Create a Single Sender

Authenticate a domain instead

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

The screenshot shows the Twilio SendGrid web interface in a browser window. The browser's address bar displays 'app.sendgrid.com/guide'. On the left, a sidebar menu lists navigation options: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as 'NEW'). The main content area features a large 'Welcome, Fauwaaz!' message with a sub-header 'Send your first emails with Twilio SendGrid'. Below this, a 'Create a sender identity' section explains the process and provides two options: 'Create a Single Sender' (a blue button) and 'Authenticate a domain instead' (a text link). An illustration shows an email header with 'Your Business' as the sender and '<jane.doe@your_business.com>' as the email address. At the bottom of the main area, a 'Send your first email' section includes a note: 'Please create a sender identity before sending your first email.' The bottom of the screen shows a Windows taskbar with the date '01-11-2022' and time '12:08'.
